Every Child Has A Right To Learn With Joy<sup>TM</sup>

Every Child Has A Right To Learn With Joy

## Our Vision

**"Redefining State Board School"**

## Our Mission

It's with this motive that the team of Madhusudhan Global School has come together to establish a school that would nurture and develop children with their capabilities. For us, this search is the beginning of a journey with the strength of educational principles to achieve the ultimate goal of excellence and pinnacle of learning.

## Director Speaks

We the management of Madhusudhan Global School hereby understand the importance of education in the life of an individual. In today's competitive world it has become a basic need in human life.

**"Upon the subject of education, not presuming to dictate any plan or system respecting it, I can only say that I view it as the most important subject which we as a people can be engaged in."**

**- Abraham Lincoln**

We believe that it is through education the difference between various classes and strata can be minimized. It is through the power of qualitative education an individual can break the paradigm of his current being and face the challenges that exist for reaching the heights of greater success.

We at Madhusudhan Global School believe that the confidence in an individual can make or break his personality. Every individual should have all the power to write script of his or her own destiny without being bogged down by expectation of the people around. It is an initiative to make your ward perceive their dreams with definite vision of his or her life.

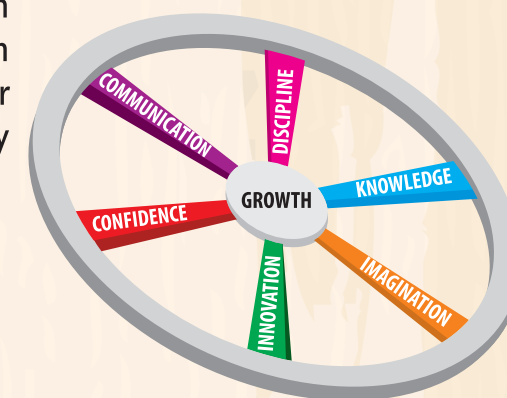

The management will strive hard to achieve the goal of imparting excellent education children and laying a strong foundation for their future.

**"Life is a series of experiences, each one of which makes us bigger, even though sometimes it is hard to realize this. For the world was built to develop character, and we must learn that the setbacks and grieves which we endure help us in our marching onward."**

**- Henry ford**

## Principal Speaks

- Every child has a right to learn with joy. Inspired by our motto making education a meaningful experience, where the child learns in an environment of joy and motivation.
- We seek to develop the creative potential of every child shaping them to be a critical thinker with global outlook.
- Knowledge, imagination, innovation, confidence, communication and discipline are main pillars for growth of the child. We strive to impart true knowledge which will enhance the 'out of box' thinking process. Thus, innovation begins with the power of imagination. We steer the confidence in children and critical thinking breeds clarity of thought which leads to effective communication.
- We understand that discipline is essential for meaningful growth of society and hence, we endeavour to inculcate The highest form of discipline amongst all students. In that we strive to put their moral values in the right perspective and also ensure that they always conduct themselves in a refined manner.
- Our focus is to make teaching and learning a joyful process.

## Our Goals

- To cultivate and sustain an integrated environment that facilitates teaching and learning.
- Preparing a strong foundation for learners by imparting adequate knowledge and requisite facilities.
- Promote academic excellence and equity for all diverse population of students under one roof.
- Creating an environment of encouragement to build the confidence of the learner.
- Sharing the responsibility of the parents in developing their wards skills, knowledge and attitude.
- The institution is committed to train and develop the skills of facilitators (teachers) so that they can teach your child with conviction.
- Setting benchmark and standards in all aspects of our school, be infrastructure, environment, curriculum and culture.
- The management will strive hard to provide a firm foundation to the learners to achieve their goal.
